PROJECTS

Plastic Waste Convert to Biogas

- Biogas can be produced from raw materials such as agricultural waste, manure, municipal waste, plant material, sewage, green waste or foodwaste Biogas is produced by anaerobic digestion with methanogen or anaerobic organisms, which digest
  material inside a closed system, or fermentation of biodegradable materials.
- Engineered a process to convert plastic waste into biogas, achieving a 40% reduction in landfill contributions and generating sustainable energy for community use.
